DETAILED ACTION

Election/Restriction

Application's election without traverse of Group I (Claims 1-14) drawn to a semiconductor device is acknowledged for prosecution in the subject application. Accordingly, claims 15-36 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Applicants have the right to file a divisional application covering the subject matter of the non-elected claims.

Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U. S. C. § 102 (e) as being anticipated by U.S. Patent No. 6,723,394 to Sirringhaus et al.

Regarding to claim 1, Sirringhaus et al. disclose an organic device comprising a substrate (fig. 1, col. 1, line 38). A photoresist layer formed on the substrate or dielectric layer, wherein the photoresist layer is provided with a plurality of microgrooves (col. 2,

lines 29-32) having an alignment direction (fig. 1, alignment layer); an organic semiconductor layer (fig. 1, LC polymer) having alignment formed on the photoresist layer, wherein the organic semiconducting layer aligns according to the alignment direction of the microgrooves of the photoresist layer; and an electrode (cols. 1-2, col. 3, lines 1-4, and fig. 1).

Allowable Subject Matter

Claims 2-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
